\textbf{Pandas Challenge "Heroes of Pymoli}
\begin{itemize}
        \item Analyzing data of a fantasy game and generating a report breaking down
the game's purchasing data.
        \end{itemize}
\textbf{WeatherPy}
\begin{itemize}
        \item Created a Python script to visualize the weather of 500+ cities across
the world of varying distance from the equator to answer the fundamental question
"what's the weather like as you approach the equator?
        \end{itemize}
```

```latex
\textbf{SQL Challenge}
\begin{itemize}
        \item Demonstrates ability to query, update and reorganize data using SQL
        \end{itemize}
\textbf{Parks and Potholes}
\begin{itemize}
        \item Utilized Chicago's data portal to try and find any correlation with
poverty, potholes reported, crime and green space in the wards of Chicago.
        \end{itemize}
\textbf{Other Projects}
\begin{itemize}
        \item Refer to my Github
        \end{itemize}
        }
