Soft Skills
Overview

Projects

Pandas Challenge "Heroes of Pymoli

- Analyzing data of a fantasy game and generating a report breaking down the game's purchasing data.

WeatherPy

- Created a Python script to visualize the weather of 500+ cities across the world of varying distance from the equator to answer the fundamental question "what's the weather like as you approach the equator?

SQL Challenge

- Demonstrates ability to query, update and reorganize data using SQL

Parks and Potholes

- Utilized Chicago's data portal to try and find any correlation with poverty, potholes reported, crime and green space in the wards of Chicago.

Other Projects

- Refer to my Github
